# Artisanal Table Accents

# Mizzar Studio

## About us

Welcome to Mizzar, a premier ceramics designer known for our commitment to design and innovation. With deep roots in India and headquartered in Dubai, we are a family-managed company dedicated to crafting exceptional ceramic pieces that blend traditional artistry with a touch of modern aesthetic.

# Vision

Mizzar's vision is to offer innovation to the HORECA industry while elevating the Indian pottery and ancillary industry.

With only standardized and mass - produced tableware options available in the market, we decided to bring a fresh perspective to it. The aim is to bring a creative platter to the chef.

We are a brand that emphasizes on tactile sensations, vibrant colors that evoke a warm feeling and emotional connection.

At Mizzar, we specialize in the meticulous creation of exquisite dinnerware, each piece lovingly handcrafted by our skilled artisans who have perfected the art of ceramic craftsmanship.

Our unwavering dedication to quality and attention to detail ensures that every item we produce is a testament to our passion for excellence and innovation in the world of ceramics.

We are a women owned enterprise.

# A play on textures

From the smooth, inviting finish of a glazed surface to the rustic charm of raw clay, our collections celebrates the artistry of imperfection.

Discover how the subtle grooves and gentle contours of our handmade creations elevate the dining ambiance, creating an unforgettable sensory experience for your patrons.

# Creative process

We follow a macro approach with design, beginning with the theme we are working on.

Narrowing down macro to visuals and moldboards, leading us to concepts and executable ideas, keeping in mind practicality and functionality for hospitality sector.

Next is sampling, prototype creating and working on different iterations.

Testing the concept with a small segment before roll out.

# Product specifications

Twice baked high fired fired stoneware.

Lead and cadmium free.

Lab tested for microwave, dishwasher and porosity.
